

AISHA RAJPAR

Software Engineering Student | Data Analytics | Backend & Django Developer
aisharajparsgr18@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | Pakistan

PROFILE SUMMARY

Motivated third-year BS Software Engineering student with hands-on experience in Python data analysis, SQL, web development, and Django backend development. Completed a 7-course Google AI certification and built 6+ real-world projects hosted on GitHub. Currently learning cybersecurity fundamentals. Seeking a summer 2026 internship to apply skills in a professional software environment.

EDUCATION

University of Sindh Jamshoro — Jamshoro, Pakistan
BS Software Engineering (3rd Year) | 2024 – 2027

Painite College Sanghar — Sanghar, Pakistan
Intermediate (Pre-Engineering) | 2022 – 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, Java, C++, HTML, CSS

Frameworks & Libraries: Django, Bootstrap, jQuery, AJAX, Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn

Databases: PostgreSQL, MySQL, Oracle, SQL

Tools & Platforms: GitHub, Git, VS Code, Power BI, MS Excel

Areas of Focus: Backend Development (Django), Data Analytics, Cybersecurity (Learning), AI & Prompt Engineering

Languages (Spoken): English (Intermediate), Urdu (Native)

PROJECTS

Netflix SQL Analysis | *PostgreSQL, SQL*

- Analyzed the Netflix dataset using complex SQL queries to explore content distribution, ratings, and genre trends.
- Identified patterns across 8,000+ titles to surface insights on regional content strategy and release trends.

Netflix Dashboard | *Power BI, Data Visualization*

- Built an interactive Power BI dashboard visualizing Netflix data across ratings, genres, release years, and regions.
- Enabled stakeholder-friendly exploration of key content metrics through dynamic filters and charts.

Customer Segmentation | *Python, Pandas, Scikit-Learn*

- Applied K-Means clustering to segment customers into behavioral groups to optimize targeted marketing strategies.
- Preprocessed and normalized data using Pandas, then evaluated cluster quality to determine optimal segment count.

Zepto SQL Analysis | *PostgreSQL, SQL*

- Conducted exploratory data analysis on Zepto product data uncovering pricing, discount, and inventory insights.
- Wrote optimized SQL queries to extract actionable business intelligence from structured retail data.

Titanic Dataset Analysis | *Python, Pandas, Seaborn*

- Performed exploratory data analysis on survival patterns based on passenger demographics and class.
- Applied data cleaning techniques and built visualizations to communicate findings clearly.

Superstore Sales Analysis | *Python, Pandas, Matplotlib*

- Cleaned and processed 9,000+ sales records to resolve inconsistencies and prepare data for analysis.
- Built visualizations identifying top-performing product categories and regional revenue trends.

Personal Portfolio Website | *HTML, CSS, JavaScript*

- Designed and developed a fully responsive portfolio website showcasing projects, skills, and contact details.
- Implemented dark mode, smooth scrolling, and mobile-first layout for cross-device compatibility.

CERTIFICATIONS

Google AI Essentials Certificate (7-Course Program) — Google

- Completed all 7 courses covering AI fundamentals, machine learning concepts, and practical AI tools.

Additional Certifications:

- Cybersecurity Fundamentals – In Progress
- Complete Web Development – Completed
- Pandas Data Analysis – Completed
- Prompt Engineering – Completed
- IEEE Xplore Webinar: Maximizing Resources for Study and Research – May 2026
