

AISHA RAJPAR

Software Engineering Student | Data Analytics | Frontend Developer

aisharajparsgr18@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#) | Pakistan

PROFILE SUMMARY

Motivated third-year BS Software Engineering student with hands-on experience in Python data analysis, SQL, and frontend web development. Completed a 7-course Google AI certification and built 6+ real-world projects hosted on GitHub, including an AI-powered teleprompter application. Seeking a summer 2026 internship to apply skills in a professional software environment.

EDUCATION

University of Sindh Jamshoro — Jamshoro, Pakistan

BS Software Engineering (3rd Year) | 2024 – 2027

Painite College Sanghar — Sanghar, Pakistan

Intermediate (Pre-Engineering) | 2022 – 2023

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, Java, C++, HTML, CSS

Frameworks & Libraries: React, FastAPI, Bootstrap, jQuery, AJAX, Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn

Databases: PostgreSQL, MySQL, Oracle, SQL

Tools & Platforms: GitHub, Git, VS Code, Power BI, MS Excel

Areas of Focus: Data Analytics, Frontend Development, AI & Prompt Engineering

Languages (Spoken): English (Intermediate), Urdu (Native)

PROJECTS

PromptFlow — AI Teleprompter | *React 19, Vite, FastAPI, Python, Gemini API*

- Built a full-stack software teleprompter with an integrated AI assistant panel powered by the Gemini API.
- Developed a script editor supporting multi-format import (TXT, Markdown, PDF, DOCX), parsed entirely client-side using pdfjs-dist and mammoth.
- Added URL import support with auto-conversion for Google Docs and GitHub raw links.
- Implemented Presentation Mode with fullscreen, countdown, auto-scroll, and mirror mode for teleprompter rigs.
- Designed a React + FastAPI AI assistant panel with full conversation history and Markdown/code rendering.
- Built multi-conversation chat history with persistent storage, keeping API keys server-side and structuring conversation state to persist context across sessions.

Faculty of Engineering & Technology Website | *HTML, CSS, Bootstrap, JavaScript, PHP, MySQL*

- Developed a structured platform for managing faculty information, departments, teachers, and teacher portfolios.
- Built a faculty homepage with a modern UI, department management, and a teacher management system.
- Created a teacher portfolio system covering skills, education, projects, awards, and publications.
- Implemented role-based login and dashboard functionality with MySQL database integration.
- Delivered a fully responsive design, strengthening full-stack web development and UI design skills.

Netflix SQL Analysis | *PostgreSQL, SQL*

- Analyzed the Netflix dataset using complex SQL queries to explore content distribution, ratings, and genre trends.
- Identified patterns across 8,000+ titles to surface insights on regional content strategy and release trends.

Customer Segmentation | *Python, Pandas, Scikit-Learn*

- Applied K-Means clustering to segment customers into behavioral groups to optimize targeted marketing strategies.
- Preprocessed and normalized data using Pandas, then evaluated cluster quality to determine optimal segment count.

Titanic Dataset Analysis | *Python, Pandas, Seaborn*

- Performed exploratory data analysis on survival patterns based on passenger demographics and class.

- Applied data cleaning techniques and built visualizations to communicate findings clearly.

Personal Portfolio Website | *HTML, CSS, JavaScript*

- Designed and developed a fully responsive portfolio website showcasing projects, skills, and contact details.
- Implemented dark mode, smooth scrolling, and mobile-first layout for cross-device compatibility.

CERTIFICATIONS

Google AI Essentials Certificate (7-Course Program) — Google

- Completed all 7 courses covering AI fundamentals, machine learning concepts, and practical AI tools.

Complete Web Development — Completed

Pandas Data Analysis — Completed

Prompt Engineering — Completed

IEEE Xplore Webinar: Maximizing Resources for Study and Research — May 2026
